**Phone:** (530) 877-0984

As part of the ongoing efforts to increase public safety and reduce hazardous fuels in the community of Cohasset, the Butte County Fire Safe Council (BCFSC) in partnership with the Cohasset Fire Safe Council, and Sierra Nevada Conservancy (SNC) will be conducting fuels reduction in the manner of mastication to reduce dense vegetation, as well as restore forest health and improve watershed resilience.

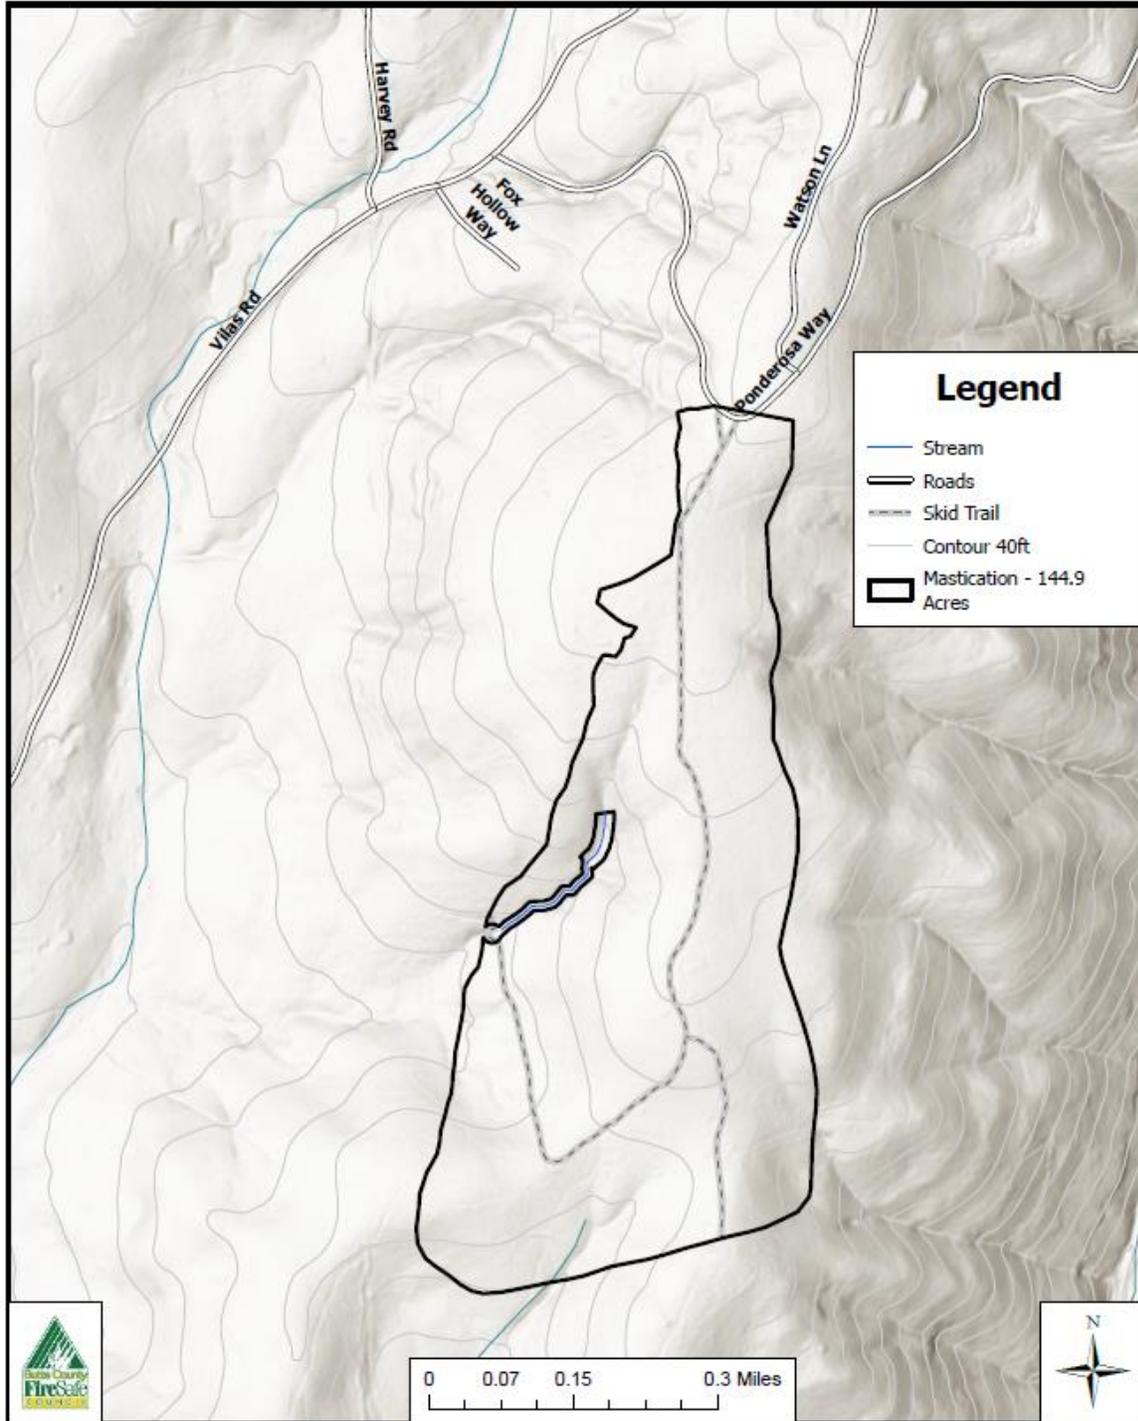

The project is strategically located along Ponderosa Way and East of Vilas Rd. The location is part of a greater effort to connect to previously completed and upcoming projects to provide overall community safety. Understory vegetation will be reduced through mechanical mastication to restore forest health and establish a fuel break for the community on up to 150 acres.

“Funding for this project has been provided by the Sierra Nevada Conservancy, an agency of the State of California.”

Work is scheduled to begin in June and continue through July. The BCFSC is a 501(c)3 non-profit, grassroots community organization.
