Press Release
Crestview Rx Project
SMOKE VISIBLE

Tomorrow, Wednesday, December 17th, we are grateful that conditions may allow for a **mechanical pile burning project** to support community safety in the **Town of Paradise**. The project will cover **12 acres** along **Nottingham Drive**, focusing on reducing hazardous fuels and restoring healthy fire ecology.

These burns will only take place under favorable conditions, with a dedicated fire crew onsite providing careful oversight and monitoring. Residents in **Paradise and Butte Creek Canyon** should expect to see visible smoke during the project. Updates and confirmation will be shared as conditions are finalized.

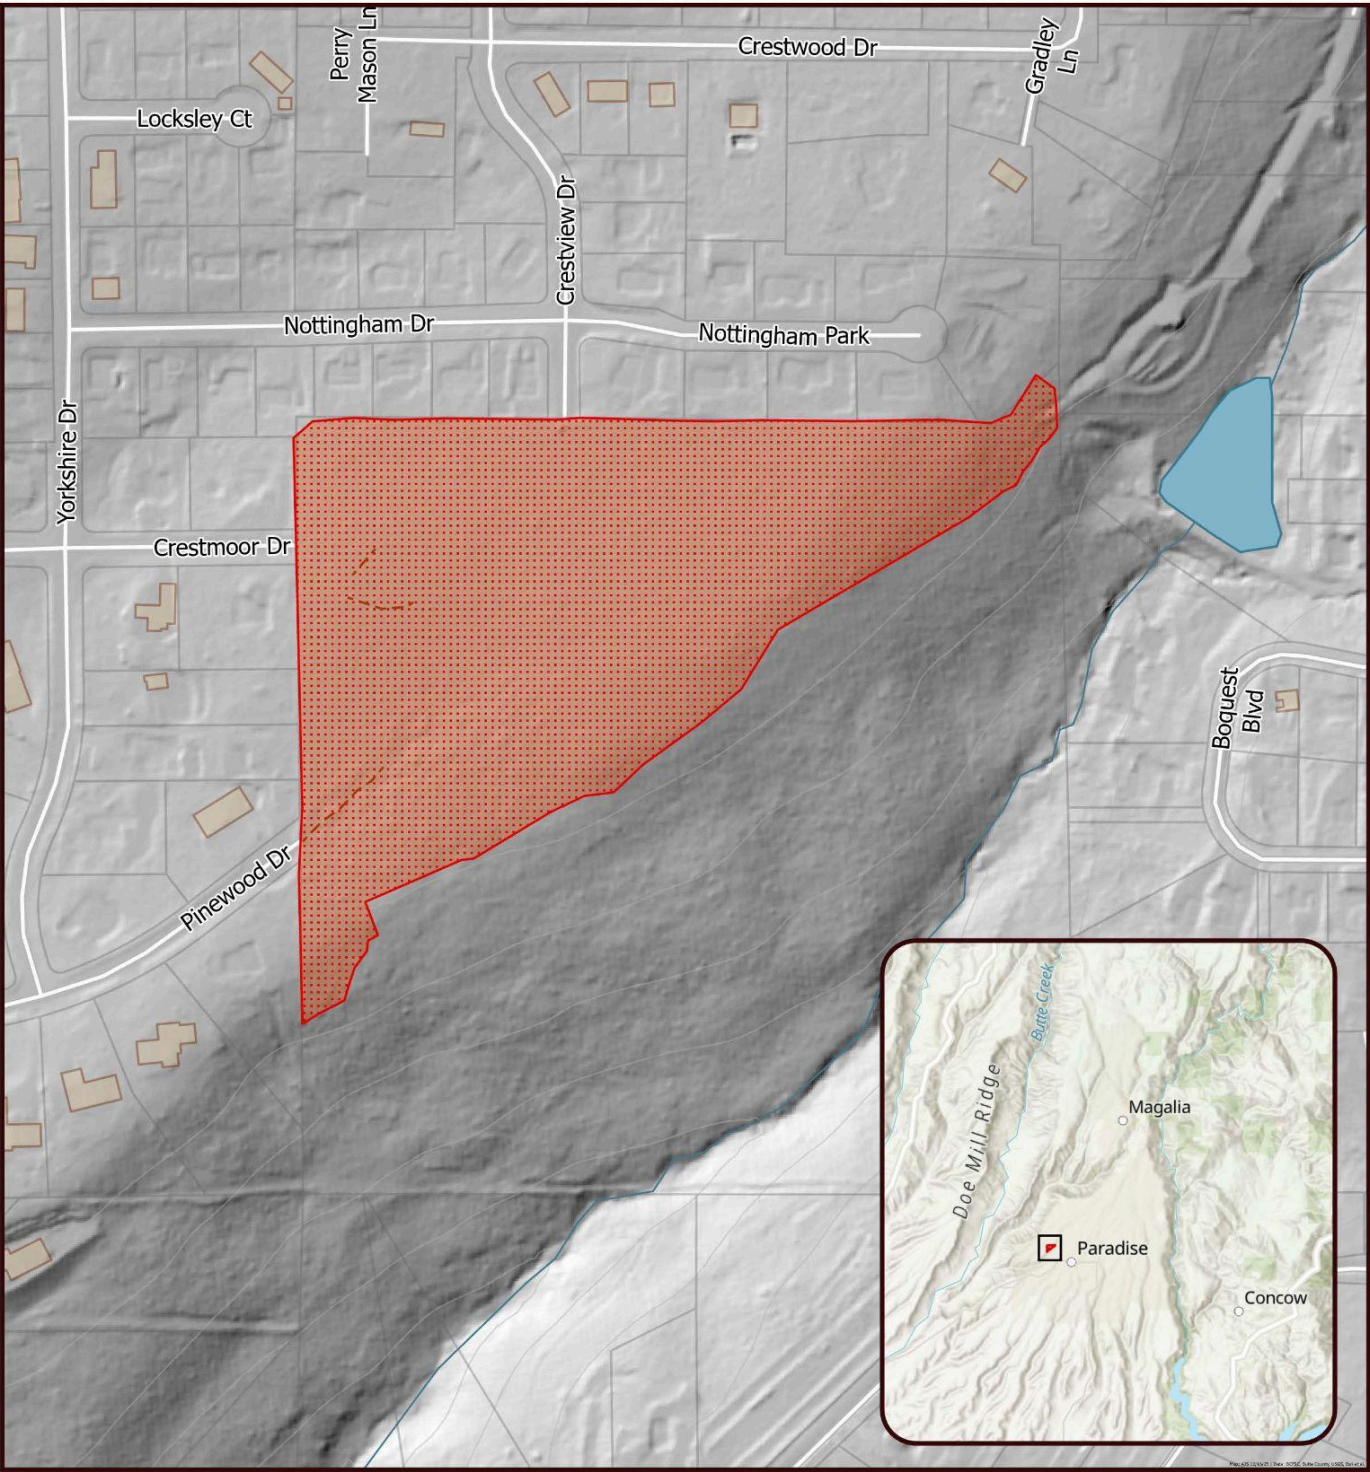

This project is managed by the Butte County Fire Safe Council, with pile burning implemented by Iron Ridge Enterprises and made possible through funding provided by the California Department of Forestry and Fire Protection's Fire Prevention Program as part of the California Climate Investments Program.

The Butte County Fire Safe Council is a grassroots non-profit organization that implements a variety of fuels reduction and forest health projects in operation around Butte County including Forbestown, Berry Creek, Forest Ranch, Cohasset, Paradise, Big Chico Creek Canyon, and Oroville Foothills. More information can be found on BCFSC's website <https://buttefiresafe.net/>, Facebook or by calling our office at (530) 877-0984.

"Funding for this project provided by the California Department of Forestry and Fire Protection's Fire Prevention Program as part of the California Climate Investments Program. California Climate Investments, a statewide program that puts billions of Cap-and-Trade dollars to work reducing GHG emissions, strengthening the economy, and improving public health and the environment- particularly in disadvantaged communities. The Cap-and-Trade program a/so creates a financial incentive for industries to invest in clean technologies and develop innovative ways to reduce pollution. California Climate Investments projects include affordable housing, renewable energy, public transportation, zero-emission vehicles, environmental restoration, more sustainable agriculture, recycling, and much more. At least 35 percent of these investments are located within and benefiting residents of disadvantaged communities, low-income communities, and low-income households across California. For more information, visit the California Climate Investments website at: www.caclimateinvestments.ca.gov."
